TRANSPORTATION & LOGISTICS

AFRICAN LEADER IN ENERGY & INFRASTRUCTURE

In a world where energy is scarce, focusing on efficiency via river or rail transport is a key competitive advantage. Our investments in railway and river transport aim to provide affordable and reliable logistics solutions that can become an engine of national and regional growth and help dismantle barriers to cross-border trade in Africa.

Our investment in the railways of Kenya and Uganda has untold potential to transform Africa's economies. Transport prices in East Africa are among the highest in the world, with transport to Uganda from Kenya presently costing more than USD 0.13 per ton-kilometer, due in large part to a heavy reliance on trucking. The efficiency — in time and cost — of rail can be a real game changer. A more efficient rail network in East Africa could bring transport costs down by as much as 35% — a savings that should have a substantial impact on businesses and consumers alike.

Over the past few years, our investments in river transport, logistics and stevedoring have gained momentum. As fuel subsidies are gradually removed in Egypt and fuel prices go up manufacturers will be seeking cheaper alternative means of transporting goods. There has never been a better time to move cargo via river barges, which are a more fuel efficient, cost-effective and environmentally friendly in comparison to trucks. The capacity of one river barge is equivalent to 45 trucks, with only a quarter of the emissions.

OALAA HOLDINGS - COMPANIES IN TRANSPORTATION & LOGISTICS

NILE LOGISTICS

Nile Logistics, Qalaa Holdings' subsidiary company in the logistics, river transport and port management sector, offers river transportation services of bulk cargo as well as stevedoring activities in seaports of the Mediterranean and the Red Sea. Nile Logistics is home to four complementary companies: Nile Cargo, National River Ports Management Company (NRPMC), Nile Barges and Ostool Trucking Company. With a well-developed portfolio of services, Nile Logistics provides seamless door-to-door service for industrial and agricultural producers and traders in Egypt and South Sudan.

AFRICA RAILWAYS

Africa Railways is the majority shareholder of Rift Valley Railways (RVR). RVR holds a 25-year concession to operate the national railways of Kenya and Uganda, linking the Indian Ocean port of Mombasa to the interiors of Kenya and Uganda, including the Ugandan capital of Kampala. For the past four years, Qalaa Holdings has been working with the RVR management and its local partners to implement a three-point turnaround program with investments of USD 305 million. RVR has completed the first phase of the replacement and rehabilitation of hundreds of kilometers of track, including the track that links Kenya with Tororo in eastern Uganda and Gulu in the north. The entire railway network is now managed through a state-of-the-art GPS-based control room from the company's headquarters in Nairobi. RVR has recently won the IOSH International Safety Award for drastically reducing the number of injuries in its Nairobi
